

BIOGRAPHICAL SKETCH

Provide the following information for the Senior/key personnel and other significant contributors in the order listed on Form Page 2. Follow this format for each person. **DO NOT EXCEED FOUR PAGES.**

NAME Guangxu Jin, Ph.D.		POSITION TITLE Instructor and Research Associate	
eRA COMMONS USER NAME (credential, e.g., agency login) GJIN2011			
EDUCATION/TRAINING (Begin with baccalaureate or other initial professional education, such as nursing, include postdoctoral training and residency training if applicable.)			
INSTITUTION AND LOCATION	DEGREE (if applicable)	MM/YY	FIELD OF STUDY
Shenyang Normal University, Shenyang	B.S.	09/02	Applied Mathematics
Shenyang Normal University, Shenyang	M.S.	09/05	Applied Mathematics
Chinese Academy of Sciences, Beijing	Ph.D.	09/08	Bioinformatics

A. Personal Statement

Dr. Jin's research develops mathematical and computational biology models for translational studies. His research experiences have launched a long-term interest in the modeling of the effects of targeted therapy drugs at the molecular off-target level. He has extensive experience in signaling pathway analyses and developed the computational models for identification of the off-targets for drug repositioning and drug combination studies. A new type of signaling network elements, called cancer signaling bridges (CSBs), has been developed for cancer drug repositioning (Jin et al, Cancer Research, 2012). The new computational model based on the CSBs is helpful to address the activated signaling pathways associated with the targeted-therapy drugs. Another computational model, called Enhanced Petri Net, has been developed for drug combination study (Jin et al, Bioinformatics, 2011). The unique of this model is at its superiority in predicting the changed signaling pathways caused by targeted therapy. Moreover, he has more than 6 years experience in translational research. Recently, he has published a drug database with visualization of drug and signaling pathway information (Fu and Jin et al, Bioinformatics, 2013).

B. Positions and Professional Activities**Positions and Employment**

2007-2008 Research Fellow, The Methodist Hospital Research Institute& Weil Cornell Medical College, TX
 2008-2012 Postdoc Fellow, The Methodist Hospital Research Institute& Weil Cornell Medical College, TX
 2012-now Instructor and Research Associate, The Methodist Hospital Research Institute& Weil Cornell Medical College, TX

Other Experience and Professional Memberships

2011- Associate Member, American Association Cancer Research
 2012- Member, American Chemical Society
 2012- Member, International Society for Computational Biology
 2011- Program Committee Member, IEEE International Conference on Systems Biology

C. Publications**Selected Publications (15 publications relevant to the proposal):**

1. Zhao H, **Jin G**, Cui K, Ren D, Liu T, Chen P, Wong S, Li F, Fan Y, Rodriguez A, Chang J, Wong ST. (2013) Novel Modeling of Cancer Cell Signaling Pathways Enables Systematic Drug Repositioning for Distinct Breast Cancer Metastases. *Cancer Res*; **73**(20); 1-15. (co-first)

2. Fu C, **Jin G**, Gao J, Zhu R, Ballesteros-Villagrana E, Wong ST. (2013) DrugMap Central (DMC), an on-line query and visualization tool to facilitate drug repositioning studies. *Bioinformatics*, **29**(14):1834-6. (co-first)

D. Research Support

Current Support

NCI 1U54 CA149196-01 (PI Stephen Wong)

4/2009 – 3/2014

NCI Center for Systematic Modeling of Cancer Development

To identify protein markers for breast cancer stem cells and niche and develop multi-scale computational model to predict treatment responses.

Role: Member, Using mathematical model to predict drug response at the molecular level.
